

2021 Canada - BC Wildfire & Drought Recovery Initiative

Business Risk Management Branch

Ministry of Agriculture, Food & Fisheries

- The Federal and the BC Provincial Governments have allocated \$20 million for an AgriRecovery initiative for agriculture producers who have been impacted by the recent wildfires and drought in BC.
- AgriRecovery is a federal-provincial-territorial disaster relief framework under Canadian Agricultural Partnership;
- It is intended to work together with the core BRM programs to assist agricultural producers to recover from natural disasters.
- The other core programs include: AgriInsurance, (Production Insurance) AgriStability and AgriInvest.

Business Risk Management Branch

Ministry of Agriculture, Food & Fisheries

- Main objective is to assist BC's agricultural producers recover from the 2021 BC wildfires and drought by providing financial assistance for the **extraordinary costs** necessary for recovery.
- **Extraordinary costs** are those which producers would not incur under normal circumstances, but which are necessary to:
 - Mitigate the impacts of the disaster; and/or
 - Resume farming operations as quickly as possible following a disaster.

Main Highlights of the Recovery Initiative

- AgriRecovery **does not** cover production or revenue declines, including those resulting from disasters.
 - It will **not** cover income losses such as lost crops, mortality on market cattle, poor conception rates or reduced weight gain. Higher feed transport or feed prices on normal feed purchases.
- Private insurance and the core BRM programs, (AgrilInsurance, AgriStability and AgriInvest), are available to help producers who are faced with production and revenue declines.
 - AgriRecovery is not designed to cover damages and losses when private insurance is available.

Main Highlights of the Recovery Initiative

- The AgriRecovery response will provide adequate compensation for **extraordinary expenses** necessary for recovery and to enable farms and ranches to return to production without undermining the role of commercial insurance or BRMB income programs
- The intention is to bring producers to a minimum level to enable the containment, feeding, watering and management of livestock through the winter of 2021/22.

Drought Recovery Initiative components include:

- Feed assistance of up to \$101.50 per ton in the Peace Region for animals affected by drought.
- 70% of transportation costs for owned feed transport assistance for animals affected by drought.
- \$3.50 per animal affected by drought for pregnancy checking. To be eligible for pregnancy checking producers must apply and be eligible for feed assistance or return to production.
- \$215 for extraordinary costs for return to production for livestock affected by drought.

Application Process

- Eligible Applicants will be required to sign and submit a completed Application Form and supporting documentation.
- If applicable, the application will include a copy of documentation on the breakdown and total compensation paid under commercial insurance and;
- If claiming eligible expenses copies of invoices and other supporting documents to the claim.

Next Steps

- The Province will continue to work with industry and producers to ensure that it meets clients needs to ensure the animal welfare can be maintained.
- BRMB will provide overall coordination on administering the response initiative.
- Dedicated staff and contractors are in place to assist producers with the application and eligibility processes as well as assessing damage, losses and the administration of payments.
